**ADDENDUM NO. 2**  
**Date: August 19, 2011**

**RFP No. 11-0424**

**RFP Title: Septic System Inspection, Repair, Maintenance and Pumping Service**

It is the vendor's responsibility to ensure their receipt of all addenda, and to clearly acknowledge all addenda within their initial bid or proposal response. Acknowledgement may be confirmed either by inclusion of a signed copy of this addendum with the initial bid or proposal response, or by completion and return of the addendum acknowledgement section of the solicitation. Failure to acknowledge each addendum may prevent the bid or proposal from being considered for award.

This addendum \_\_\_\_ does X does not change the date for receipt of bids or proposals.

**See attached revised pricing pages, revised on 08/19/2011.**

**Clarification** - Delete the following words that are striked through under Initial Inspection (page 16 of the RFP):

Within 60 calendar days after a notice to proceed has been issued, the Contractor shall perform a detailed inspection of ~~all certain~~ septic tanks listed in this scope as directed by the County Project Manager. These inspections shall take place during regular County business hours M-F 8am to 5pm unless approved by the Project Manager. The inspection shall include:

- Size of the tank
- Shape of the tank
- Type of tank construction
- Condition of the tank
- Condition of drain field
- The volume of solids, scum, and sludge in the tank

**Question 1:** Under Initial Inspection (page 16 of the RFP) it states the below paragraph. I am not sure I understand the last sentence and how the charges are to be billed. Is the inspection fee and certification charge waived if we pump the tank?

If it is determined during the inspection that the tank is in need of pumping, the Contractor shall immediately call the Project Manager for approval. The Project Manager may visit the site and the Contractor will be required to provide proof that the tank needs pumped. **If after approval the tank is pumped all inspection charges shall be applied to the cost of pumping and, if requested by the Project Manager, certification.**

**Answer 1:** The fee for inspection shall be applied to the cost of pumping and certification only if the vendor has made the inspection with the vehicle/equipment that would be used for pumping and pumping is going to be completed at the same time as inspection. If the pumping necessitates an additional vehicle/trip then the inspection fee shall be paid.
